

Transport Management System

Plan faster, deliver smarter, get paid sooner. Built for 3PLs and Hauliers.

Running a 3PL, haulage firm, or pallet network means juggling hundreds of orders, complex routes, and endless paperwork. Vigo handles the admin so you can focus on **service levels** and **profitability**.

One integrated platform. Your office team, warehouse floor, drivers, and clients - all connected in real time.

Order Management

Pull jobs automatically from client integrations and your client portal, route seamlessly to your fully integrated pallet networks, apply pricing rules, and manage hazchem compliance - **all with full order-level cost tracking. No re-keying. No pricing errors.**

Planning Tools

Plan on truck-specific maps, cut planning time with AI-powered route optimisation, and drag and drop jobs into the timetable - all from one screen. Set zone-based rules, track live ETAs, and build plans for full loads, multidrop, and groupage. **And because every business is different, we design workflows that suit yours.**

“Payback was achieved in less than six months - which makes it easy for me to recommend Vigo Software.”

Stuart Charter,
Aztek Logistics
