

Warehouse Management System

Streamline, scan, succeed. Built for 3PLs, hauliers, and SME logistics businesses.

Less manual processes. More accurate inventory. Built for UK logistics operators.

Manual warehouse processes and paper-based systems cost businesses money every day - through stock discrepancies, wasted operator time, and delayed decisions. Vigo's WMS gives you real-time control of inbound, storage, picking, and despatch in one integrated platform.

Fully connected with Vigo's TMS for complete end-to-end logistics visibility.

Mobile Warehouse

Wireless synchronisation via WiFi puts live order information on handheld devices instantly. Pickers follow on-screen instructions to scan and fulfil orders with speed and precision - **no paper, no manual errors, no excuses.**

Goods Receiving

Validate inbound deliveries against client requirements, allocate bin locations with auto put-away rules, apply flexible inbound charging, and manage quality control - **all at the point of receipt.**

Storage & Inventory

Full stock visibility from receipt to despatch. Cycle counting, blank bin reporting, aged stock reports, and real-time inventory levels shared with your clients via the Vigo Client Portal - **giving them confidence in your operation.**

Automated Reporting Suite

Build and schedule reports that go to the right people at the right time - automatically. From inbound stock reports to inventory summaries, set reports to run on a schedule or trigger them on demand. Delivered straight to your clients, team, or management - **no spreadsheets, no manual compiling, no wasted time**

Despatch & Cross Docking

Integrated directly with VIGO TMS and the Cross Dock solution, warehouse orders are labelled, loaded, and despatched seamlessly - **with outbound charges applied automatically to eliminate manual invoicing errors.**

Billing & Invoicing

Multiple rate cards for receiving, despatch, pick charges, pallet, case, and container handling. Flexible storage charging, email invoicing, and full accounts integration. **Billing that works the way your warehouse does.**

Higher stock accuracy

Thousands saved in error-related claims

Lower operating costs

Tangible ROI

Increased throughput per operator
